Manchester

# What is a Degree Apprenticeship?

A Degree Apprenticeship provides your team members with the **chance to upskill while working**. At the University of Greater Manchester you can invest in your employees with Level 5 and 6 degrees.

## How does it help my business?

Learners can achieve their academic dreams and as an employer you get higher-skilled employees who bring their learning back into your business at little-to- no cost to you.

## Who pays for it?

If you have an annual pay bill of over £3 million per annum, you will be a levy payer, which is used to fund Apprentice training. Smaller non-levy paying companies will pay 5% of apprenticeships costs, with the Government contributing the other 95%.
